

PEACE OF MIND! That's what the DO NOT CALL law has provided for me and my family. What aggravation it was every night and every weekend and yes, even late at night to be bothered over and over by people hawking something over the phone. Many times it would just ring and even though it was a vendor call, nobody would answer, it was frustrating to say the least. Other times the person would ask for my wife by her first name .. and make it seem as if they knew her personally .. which was also a way of entering our personal lives without us opening the door.

PLEASE DO NOT CHANGE THE "DO NOT CALL" LAW for New Jersey ... we love it just the way it stands right now! Thank you for your consideration in this matter for our rights as US Citizens and voters. Sincerely, George
